## Introduction

First issued in August 2001, The PAL lists all known medium wave broadcasting stations in southern and eastern Asia and the Pacific. It covers an area extending as far west as Afghanistan and as far east as Alaska, or roughly one half of the earth's surface! It now lists over 4000 stations in 60 countries, with frequencies, call signs, locations, power, networks, schedules, languages, formats, networks and other information. The log also includes longwave broadcasters, as well as medium wave beacons and weather stations in the region.

Since early 2005, there have been two versions of the Log: a downloadable pdf version and an interactive on-line version. The pdf version is updated a few a year and is available at no cost. There are two listings in the log, one sorted by frequency and the other by country. The on-line version is updated more often and allows the user to search by frequency, country, location, or station. It and the pdf versions can be found at the Radio Heritage website at:

<http://www.radioheritage.net/PAL.asp>.

## Abbreviations & Comments

**Frequency:** All stations are listed to the nearest kHz. I've noted deviating stations with a "v", those which are currently inactive with a "\*\*", and future stations (not yet on the air) with an "f". A "?" means current status (active or inactive) is unknown. See the comments column for additional details.

**Call:** The station's government-assigned call letters (applicable mainly for Australia, Japan, Korea (South), Philippines, Taiwan, and U.S. stations)

**Network/ Slogan:** This is generally the Network or Station name as announced on the air or in documentation.

ABC Australian Broadcasting Commission, AFN American Forces Network (U.S. Military), AIR: All India Radio, BCC: Broadcasting Corp of China (Taiwan), Bctg, Bcing: Broadcasting (BC=Broadcast), BS: Broadcasting Station, CBS: Christian Broadcasting System (Korea), CBS: Central Broadcasting System (Taiwan), CNR: China National Radio, CRI: China Radio International, JGD: Jingji Guangbo Dientai (China), KBS: Korean Broadcasting System, KCBS: Korean Central Broadcasting Station (N Korea), LNR: Lao National Radio, MBC: Munhwa Broadcasting Corporation (South Korea), NBC: National Broadcasting Corp (Papua New Guinea), Net: Network, NHK: Nippon Hoso Kyokai (Japan), R: Radio (RS:Radio Station), RGD: Renmin Guangbo Dientai (China), RRI: Radio Republik Indonesia, RTHK: Radio TV Hong Kong, VoV: Voice of Vietnam (aka VTVN)

**Location:** As shown in government lists, station/network web sites, or on-air announcement. Sometimes the transmitter site is shown in parentheses if it's in a district or outlying community of a large city.

**Adm:** The state, province, prefecture, oblast, county, borough, autonomous region, territory, island, etc. where the station is located.

**Power:** Power is in kW, d indicates directional antenna (see comments for more details, where available). Powers were obtained from government lists, station documents/websites, on-air announcements, and other "reliable" sources. See below for information on directional arrays

**Comments:** This column lists miscellaneous information, including schedules, technical information, program information, current status, future plans, shortwave/mediumwave/FM parallels, etc.

**Languages:** CC-Chinese (Mandarin), EE-English, FF-French, GG-German, JJ-Japanese, KK-Korean, RR-Russian. Other language names are written in full. No language info usually means the station broadcasts in the country/region's dominant language(s), such as English in Australia, Tagalog in the Philippines etc. Ethnic generally means the station broadcasts in several different languages.

**Schedule:** All times are in UTC, except where noted (LT=local time). Some schedules may shift by one hour during local summer. 24h means 24 hours. Days of the week are intended to be UTC, and may not be the same as local dates, i.e. 0100 local time on Monday in Japan is actually 1600 Sunday UTC.

**SW:** Possible shortwave parallel, may not operate on the same schedule as the medium wave station. // means SW or medium wave parallel. FM usually refers to FM parallel, based on monitored or published information, but the AM and FM may not always simulcast

**News Networks/relays:** BBC-British Broadcasting Corp., AP-Associated Press (US), NPR-National Public Radio (US), ABC/CNN/CBS - US news networks, R.A ABC-Australian BCing Commission or American BCing Company, RNZ-R New Zealand, DW-Deutsche Welle, SRN: Sonshine Radio Network (Philippines) or Salem Radio Network (US), CCTV:China Central TV, AON: Australia Overnight (talk show)

**DA-Directional antenna** Generally shown as compass directions(i.e. DA-S means beamed to the south), also noted as xxxdeg for some stations.

*r indicates a relay of another station.* This is generally unattended, such as most of the low powered NHK stations. In some cases, it refers to a station that relays another during part of its broadcast day.

The following links are located at the far right side of the listings.

**Web** in most cases this is the primary website for the station or network. In some cases I've substituted Facebook, Wikipedia, or other sites if the station does not have a website, or it's out of date, lacking in useful information, infected with malware, or otherwise not acceptable.

**Audio:** This is the link to the station or network's streaming audio (real time or slightly delayed). For now, I'm only listing links that are working, do not require a subscription or special client software, and do not have malware or other warnings. In some cases, this link is the same as the web site. Some sites include audio feeds for multiple networks or stations, in which case you will determine the correct choice.

**Archive:** A link for retrieving audio recordings of all or part of earlier broadcasts. Some include everything aired during previous hours, days or weeks. Others have podcasts or other recordings of previously aired programs. I've only included those where the original broadcasts' times and dates clearly identified.

## COUNTRY LISTINGS

This listing includes broadcasting stations in the long and medium wave bands, plus selected domestic shortwave stations. It also lists traveller's information stations in Alaska and Hawaii and weather stations above 1600 kHz in Japan. For beacons, see the beacon listing at the end of this section.

I've included some additional information for each country, in addition to the list of stations. This information may include time zone, website links for major stations and networks, hobby sites related to that country, or government-run sites (especially search tools). There are also links to streaming audio, particularly web site that list the links for many stations or networks.

There are also descriptions of the major networks, including schedules, lists of outlets (for parallel programming), and links to web pages.

In some cases, I've also included tips for identifying stations (such as time pips, ID times, etc).

Except for Australia and China, the country listings are sorted by Frequency and then by country, where there is more than one station on a frequency. Australia and China are sorted first by state or province, then by frequency, then by location. China has also been organized into separate CNR, CRI, and local/provincial listings.

### Useful information:

- The URLs for most commercial Aussie stations consists of the call letters followed by .com.au – for example, the website for 4BC-1116 is <https://www.4bc.com.au/> There are a few exceptions, such as 2WEB-585, which uses <https://www.outbackradio.com.au/>
- **Australian Communications and Media Authority (ACMA)**, Register of Radio communications Licences, search by frequency: [https://web.acma.gov.au/rrl/assignment\\_range.search](https://web.acma.gov.au/rrl/assignment_range.search)
- In regional areas, commercial radio stations must broadcast minimum amounts of local content between 5am and 8pm each business day. The minimum depends on the size of the community. The minimum is 30 minutes in areas with less than 30,000 people, 3 hours in other areas
- The website **Radio Today** <https://www.radiotoday.com.au/> has recent news stories about Australian radio stations and personalities.
- **Newmedia** <http://www.newmedia.com.au/index.html> also has Australian radio news.
- The **RadiolInfo** site, <https://www.radioinfo.com.au/>, likewise has news about Australian radio. The site also has searchable maps showing the locations of Australian AM and FM stations, with links to the ACMA database entries.
- The website **fccdata.org** is a search tool for AM/FM/TV broadcast stations in various countries, including Australia. The search results include data for the transmitter site (address, lat/long, power, frequency, etc.), as well as a map showing the site's location, based from information in the ACMA database. The URL is <https://fccdata.org/?lang=en&search=aus>. The site can also search for stations in Japan, UK, Ireland, Mexico, Canada and the USA.
- The website [www.radio-australia.org](http://www.radio-australia.org) has streaming audio links for over 500 AM, FM, and digital radio stations in Australia. I believe I've got the links for all the AM's covered in the PAL, but it can be a handy way to double check, or to find streams for FM stations.
- **Australian Radio DX Club:** <https://www.facebook.com/ARDXC.Inc/> The club publishes the 'Australian DX News' 11 times a year, featuring member's loggings, news, and feature articles. Membership is offered in print and electronic subscriptions to both Australian and international members

### MAJOR NETWORKS:

**ABC News radio:** a nationwide news network with outlets in the major cities. The network is gradually expanding to include smaller cities as well. Programs are mainly rolling news, weather, sports, etc., but it also carries BBC, NPR, and Deutsche Welle programs several hours per day, especially after 9 p.m. and on weekends. It also broadcasts the Australian Parliament when it is in session; these broadcasts can last late into the evening local time. Web site: <http://www.abc.net.au/newsradio/> includes a detailed program schedule. ABC Newsradio gives occasional IDs for individual transmitters, generally around 15 & 45 minutes past the hour. For example, "ABC Newsradio....When in Sydney listen to 6-3-0 AM"

Major outlets on medium wave include 585 Perth, 630 Sydney, 747 Hobart, 936 Brisbane, 972 Adelaide, 1026 Melbourne, 1152 Busselton, and 1458 Newcastle. Streaming audio: <http://www.abc.net.au/radio/stations/news/live?play=tru>

**ABC Local and Regional Radio:** ABC stations in the larger cities originate their own programs during much of the day. In addition, there are many regional networks, each consisting of several AM & FM stations. These stations carry local programs up to several hours per day. Network programs fed from the state capital fill out the rest of the day. Typically, ABC Radio Local and Regional stations have their own breakfast shows, then state networked programs until midafternoon, when there are additional local programs. Then, programs are usually networked from the state capital from 7 to 10pm. However, exact schedules can vary for specific stations. After 10pm (1200 UTC), all stations are networked from Sydney overnight. All ABC Metro and Regional stations carry “Night Life” 1200-1600 UTC and “Overnights Weekdays” 1600-1900 UTC. The website <http://www.abc.net.au/local/> lists program schedules for each of the stations and networks. Some stations have a regional weather forecast at the end of the hourly national news.

**ABC Radio National:** A nationwide network. Broadcasts include a variety of news, music, talk, and special interest programs. Outlets are on 576, 585, 603, 612, 621, 630, 639, 657, 684, 720, 729, 756, 792, 810, 846, 990, 1098, 1152, 1296, 1305, 1431, 1485, 1512, and 1584. Web site: <http://www.abc.net.au/rn/> includes a detailed program schedule. Streaming audio: <http://www.abc.net.au/radio/stations/RN/live?play=true>

**Community Broadcasting Association of Australia (CBAA):** is a support organization for indigenous, ethnic, religious, print disabled, and other non-commercial stations catering to specific communities in Australia. It provides operation and program assistance to its member stations. These services include the **Community Radio Network (CRN)**, which distributes radio programs distributed via satellite and internet. The network’s program schedule and list can be downloaded at <https://www.cbaa.org.au/broadcasters/get-content-your-station-or-program/crn-program-guide> The CBAA website is <https://www.cbaa.org.au/>.

**Crocmedia/SEN:** According to its website, Crocmedia is a multi-platform content and entertainment group and the largest syndicator of sports radio content in Australia. It recently acquired a number of AM licenses including 657 Perth, 801 Gosford, and 1575 Wollongong. In March 2020, it launched **SENTrack** to support Australia’s racing, harness and greyhound industries while those sports are still able to operate under COVID-19 guidelines. SENTrack operates on these channels plus Brisbane 1053 and Melbourne 1593. Crocmedia has also acquired approximately 15 expanded band assignments formerly used by Rete Italia, and will activate them in the future. The website is <https://crocmedia.com.au/about-us>.

Crocmedia also distributes several sports-oriented programs via radio and other media. See <https://sportsdayradio.com.au/vic/#1515624222732-7879ae09-ac79> for a list of stations carrying the “Sportsday” radio show.

**Nine Radio:** In January 2020, the Macquarie Radio Network began rebranding its radio services as Nine Radio. News bulletins and program are now called “Nine News”. The old Macquarie website <http://www.mrn.com.au/> now forwards <https://www.nineforbrands.com.au/branding>. The company operates four stations: 2GB-873, 3AW-693, 6PR-882, and 4BC-1116 as newstalk stations with the ability to distribute program content to affiliated network stations.

The former Macquarie News is now known as “Nine News”. The network has National News bulletins every half hour throughout the day. Typically, they include 3.5 minutes of news and 1 minute of sports for a total of 4:30 minutes. There are separate feeds for NSW, Qld, SA, and Vic stations.

The website <https://www.mmsyndication.com.au/programming-and-services> lists numerous programs syndicated by the network to stations throughout Australia. Some of the nighttime programs are listed below.

**Southern Cross Austereo (SCA)** is a media company that operates radio stations, produces programs, and runs radio networks throughout Australia. Most of its stations are on FM, but it has about a dozen **Triple M** branded AM stations, mostly in Western Australia. The SCA website is <https://www.southerncrossaustereo.com.au/> and the Triple M site is <https://www.triplem.com.au/listen> with links to local and regional stations’ websites and streaming audio. The stations carry some of the same programs, including “Australia by Night with Stephen Cenatiempo” 10pm – Midnight LT Weekdays, “Night Shift with Luke Bona” 12-5:30am LT Weekdays, and some sporting events and special music shows. Some stations have blocks of classic rock or oldies music, but it’s not clear if any are parallel to the others. Some programs may also be carried by non-branded stations. The SCA “Regional Media Guide” <https://www.southerncrossaustereo.com.au/media/1398/tile-1-regionalmediaguidefinalpdf.pdf> identifies the AM/FM stations affiliated with SCA, but does not mention any program content they may carry.

## **Comments:**

- In the China listing, if the station name is written in full it's been recently confirmed by direct listening. If the name contains abbreviations, such as Shanghai RGD, then the information is at least a couple of years old and needs to be (re)confirmed.
- Chinese stations generally have time pips on the hour, and then the time in Beijing. There are usually 5 short tones and one longer higher pitched tone marking the hour. I'm starting to note exceptions in the listings. The final tone often does not end exactly on the hour – it can be anywhere from a few seconds before to 30 seconds after the top of the hour. Station IDs are sometimes made just after the time check, sometimes just before the hour, sometimes a couple minutes later after a few commercials or other announcements. They can also be made at convenient times anytime during the hour.
- As of 12 July 2020, there are 4684 MW/LW/SW entries in the PAL. 2166 of them are located in China (about 45 percent). 535 of them are for CNR1.

**Online kiwiSDR Receivers:** located in China and neighboring countries. Useful for checking program content.

**China National Radio (Zhongyang Renmin Guangbo Diantai)** operates 17 networks or independent stations. The CNR website is <http://www.cnradio.com/> (in Chinese). The Nagoya DX Circle has a complete CNR shortwave frequency listing posted on its website at <http://www2.starcat.ne.jp/~ndxc/> shortwave transmitter sites and their schedules are also included in this listing. The CNR organization name "Zhongyang Renmin Guangbo Diantai" (Central People's Broadcasting Station) is often announced before the individual channel name. The website <http://www.radio.cn/pc-portal/erji/radioStation.html> has an archive of the past two weeks' programming for all CNR networks and stations.

## Useful Information

- The website **fccdata.org** is a search tool for AM/FM/TV broadcast stations in various countries, including Japan. The search results include data for the transmitter site (address, lat/long, power, frequency, etc.), as well as a map showing the site's location. It also lists the lower-powered relay stations associated with each of the major NHK and commercial stations. The URL is <https://fccdata.org/?lang=en&search=jpn>. The site can also search for stations in Australia, UK, Ireland, Mexico, Canada and the USA.
- Streaming audio and podcasts for Japanese commercial and NHK stations are usually blocked for IP addresses outside Japan. Sometimes there are exceptions, such as in mid-2020 when NHK opened up JOGK-756's streaming audio for worldwide coverage of a flooding disaster. Unless you are using a Japanese IP address you'll need to use a proxy server or some other legal means to receive the audio streams.
- The **denpa-data** website (in Japanese) lists AM/FM/TV stations in Japan, including data on low power relay stations. Fccdata.org uses it as an information source. The URL is <http://www.denpa-data.com/denpadata/>
- The Ministry of Internal Affairs and Communications (MIC) has a very large website called "The Radio Use Web Site" devoted to regulatory and technical matters. The URL for the English version is <https://www.tele.soumu.go.jp/e/index.htm>. There is a search tool with various search criteria. <https://www.tele.soumu.go.jp/musen/SearchServlet?pageID=1> (in Japanese but Google can translate it into English)
- TDXC **Propagation** is published once a year by the Totsuka DXers Circle. Each edition is 100-200+ pages long and has dozens of articles in Japanese and English about receivers, antennas, DXpeditions, and other aspects of MW/SW/FM DXing. The 2019-2013 editions can be downloaded from <http://my-bcl-life.sakura.ne.jp/PROPAGATION.htm>
- The Japan Commercial Broadcasters Association website has information about the country's radio and TV industry, including links to member stations' websites. <https://www.j-ba.or.jp/category/english>

## MAJOR NETWORKS

**Nippon Hoso Kyokai, First Network (NHK1)** is a general news, public affairs, and entertainment network and operates 24 hours per day. Key stations are noted in the listing. Most programs originate in Tokyo and are fed simultaneously to all stations in the network. Short local programs are inserted throughout the day by the stations in the larger cities and fed to their respective local networks (generally within the same prefecture). Local IDs with call letters and location are given at 1959, 0259, and 0959. The following table lists the local breaks, as of December 2019. All breaks are 5 minutes long except as noted.

NHK1 outlets are on 531, 540, 549, 567, 576, 585, 594, 603, 621, 639, 648, 666, 675, 684, 729, 756, 792, 819, 837, 846, 882, 891, 927, 945, 963, 981, 990, 999, 1026, 1071, 1161, 1188, 1224, 1296, 1323, 1341, 1368, 1503, and 1584. NHK Web site (in Japanese): <http://www.nhk.or.jp/> (main NHK home page). Add the name of the city for local stations' web pages, i.e. <http://www.nhk.or.jp/sapporo/>

NHK1 stations operate 24/7 but sometimes have scheduled outages for maintenance purposes. These outages are usually on Tuesday mornings from 1-5 a.m. JST (1600-2000 UTC) once or twice a month. The outage information is posted on the NHK website. The following process is usually successful, and assumes you are translating each page into English (which is essential unless you can read Japanese).

1. Enter the following URL into your browser: [https://www.nhk.or.jp/xxx/station\\_info](https://www.nhk.or.jp/xxx/station_info), where xxx is the station's location (large city or prefecture, depending on the station)
2. Find the link named "Broadcast Suspension Notice" and click on it. There should be a list of outages for the current month
3. Find the outages labelled R1 or similar. Those are the NHK1 station outages. Times are JST. Osaka seems to use a graphic image which can't be translated. All the others I've seen can be converted to English

The above steps have worked for every station I've tried except for Tokyo. Maybe JOAK doesn't ever go off?

**Nippon Hoso Kyokai, Second Network (NHK 2)** is an educational network. A typical broadcast day includes several hours each of high school broadcasts, cultural programs, and foreign language lessons and newscasts. All programs originate in Tokyo and are fed simultaneously to all stations in the network. There are no locally originated programs, except for weather reports. The morning broadcasts include foreign language programs between 2100 and 0100. The following evening schedule was obtained from the NHK website in December 2019. Blanks indicate cultural or high school programs in Japanese. The schedule changes frequently, so the times listed may not be current.

**Allnight Nippon** is a popular late night program carried by 36 radio stations in Japan (about two-thirds of the commercial MW stations in the country). The program is produced by JOLF-1242 (Nippon Hoso) for NRN member stations. See the program's web site at <http://www.allnightnippon.com/> (in Japanese) for additional details. The times are shown as "ANN: xxx" for each station's listing in the list below and are accurate as of April 2020. Times listed are UTC. There are several segments to the program: 1300-1500 Mon-Fri "Music10", 1600-1800 Mon-Fri, 1800-1930(2000 on Fri Sat) Mon-Sat "All Night Nippon Zero", 1430-1600 Saturday "Six Tones All Night Nippon Saturday Special". The opening theme is "Bittersweet Samba" by Herb Alpert.

**Japan Radio Network (Japan rajio nettowaku, JRN)** is a commercial radio network in Japan. The flagship station is TBS Radio (JOKR-954). Most Japanese commercial stations are affiliates, as noted in the comments field in the station listings below. The website is <https://www.tbsradio.jp/jrn/> but seems to have only links to member stations' websites. Programs known to be scheduled during local nighttime include:

- "Fine!!" is broadcast M-F 1800-2000 UTC. It is a discussion program with various guests and originates from JOKR-954. Website is <https://www.tbsradio.jp/fine/> Many stations carry it.
- "After Six Junction" originates from JOKR-954 0900-1200 M-F. A few stations carry it, including HBC (JOHR-1287), JRT (JOJR-1269, Tu only), KNB, and others. I don't know the actual program name announced on the air. Website: <https://www.tbsradio.jp/a6j/>

**National Radio Network (zenkoku rajio nettowaku, NRN)** is a commercial radio network with approximately 40 members. The flagship stations are Bunka Hoso (JOQR-1134) and Nippon Hoso (JOLF-1242). Affiliates include most of the commercial Japanese stations, and are identified as NRN in the comments field in the station listings. The website is <http://radio-net.jp/>. The page <http://radio-net.jp/contents.html> has a table showing which programs are carried by each station in the network, but no times are shown. Some of the programs scheduled for local nighttime include:

- "Shingo Murakami and economic kun" is broadcast once per week by about 10 stations at various times. This name is the English translation provided by Google. It's called something else in Japanese. The show's website has a list of stations and times <http://www.joqr.co.jp/murakami/> The program is an hour long and deals with business and economics.
- "Rekomen!" (Recommendation!) Originates from JOQR-1134 and is carried by a large number of other stations. The full program airs M-Th 1300-1600 UTC, but many stations carry only the final hour 1500-1600 between two segments of All-Night Nippon. The program's website is <http://www.joqr.co.jp/reco/>

## KOREA (SOUTH)

**Time zone:** UTC+9

**National Anthem:** <https://www.youtube.com/watch?v=CceXXXubvdE> Broadcast at about 5 a.m. on some networks.

### **Useful Information:**

- Chris Kadlec's "**Seoul AM Radio Listening Guide**" has downloadable mp3 and pdf files that include reception of stations in Seoul, including the Korean and neighboring countries: <http://www.chriskadlec.com/radio/seoul>
- The Korean language website **namu.wiki** includes (among other things) much up to date information on Korean stations. Due to language differences, it can be difficult using the site's search tool. I've found Google to be an easier method by entering network, frequency call, city etc.
- **Korea Communications Commission (KCC)** <https://eng.kcc.go.kr/user/ehpMain.do> (English version), <https://kcc.go.kr/user.do> (Korean version)

**Online KiwiSDR receiver at Daejeon:** <http://hikijun.iptime.org:8074/> (it had a severe electrical noise problem July 2020)

### **MAJOR NETWORKS**

**KBS1** is a 24-hour network of news, sports, and public affairs programs. There are a number of key regional stations, each of which feeds a number of lower-powered repeaters in neighboring towns. Regional stations usually have local programs 2330-2358 0210-0258 0810-0858 and 0910-0958. They also break for five minutes of local news at 2210(2205Su) 0005(0000SaSu) 0315(0310SaSu) 0605 0805(0800SaSu) and 0905(0900SaSu). The balance of the programming originates from Seoul and is carried by all stations in the network. Local ID's are inserted at the top of the hour, but may or may not be broadcast every hour. Three short pips and a long tone mark the hour. All the KBS1 stations for Seoul and Gyeonggi Province relay HLKA-711 100% of the time. KBS 1 stations operate on 567, 630, 657, 711, 738, 747, 864, 882, 891, 963, 1035, 1062, 1098, 1152, 1323, 1449, and 1467.

**KBS2** is an arts and culture network and operates 22 hours per day on 558 and 603 kHz. It identifies as "Happy FM" (in English).

**KBS3** is also known as the "Voice of Love" and has programming for the disabled 21 hours per day. It operates on 576, 675, 936, and 1134. News bulletins are at :00 most (not all) hours 2100-1500 weekdays only (no news SaSu)

**Hanminjok Bangsong** is government-operated on 972 kHz with programs intended for listeners in North Korea. A second outlet operates on 1170 when the transmitter is being not used by KBS World Radio. The name roughly translates as "One people/race/nation broadcast".

KBS Web sites: <http://radio.kbs.co.kr/> (main KBS radio network home page in Korean)

**Christian Broadcasting System** operates 24 hours from Seoul on 837 kHz. The website is <http://www.cbs.co.kr/>. The network's hourly time signal is sponsored by Samsung 2100-1400.

**Munhwa Broadcasting Corporation** is a privately operated commercial network with varied programming. The main station is HLKV-900 in Seoul. Most stations carry local programs and news several times during the day. See individual listings for details. All stations operate 24 hours except for 1700-2155 on the first Sunday of each month.

**Time zone:** UTC+9

**National Anthem:** [https://www.youtube.com/watch?v=JA0IF3O\\_Nzg](https://www.youtube.com/watch?v=JA0IF3O_Nzg)

## **Useful Information:**

- The UN Development Program has put out an extremely detailed notice calling for bids to replace the 1584 kHz T8AA transmitter on Palau which has been off the air since 2012, leaving the official station on FM 87.9 only with inadequate coverage. The work includes providing, installing and commissioning a new 150-foot-high AM Broadcast antenna and a new 5kw AM transmitter.
- The AM radio tower at Malakal collapsed during typhoon Bopha late 2012 and was not replaced because of budget constraints. Government AM radio was the only nationwide broadcast service in Palau. Many listeners live in northern state of Kayangel, the southern state of Hatohobei and the SW Islands cannot receive any radio broadcast service at present. They are suffering from lack of real time information during Typhoon, Earthquake, Tsunami and other emergencies, caused by the AM station being off air.

## Useful Information:

- NBC is currently refurbishing many of its stations. The highest priority has been for studio and office improvements in buildings condemned by local health authorities. The upgrades have also included new studio equipment and, in some cases, upgraded transmitting facilities. In 2019, funds were provided for upgrading NBC New Ireland, Morobe and Gulf. In 2020, funds are being provided for NBC Western, Madang, Western Highlands, East New Britain, and Enga.
- NBC website is gone. Wikipedia page [https://en.wikipedia.org/wiki/NBC\\_PNG](https://en.wikipedia.org/wiki/NBC_PNG) lists Facebook/Twitter pages for some local stations.

## MAJOR NETWORKS

**ABS-CBN Broadcasting:** this network is currently off the air as of March 2020. It's part of a large conglomerate that also owns the country's largest television network. In recent years, ABS-CBN has been in a protracted legal battle with the government, apparently from news coverage of President Duterte's administration. For more details, Google ABS-CBN and you'll find lots of reading material. The radio network is still operating via the internet from its flagship station DZMM-630. The network's website is <https://www.abs-cbn.com/>

**Bombo Radyo** is a commercial network with about 20 stations. See the network's website at <http://www.bomboradyo.com> for station information and streaming audio. Bombo is the Filipino word for drum and has been incorporated into the network's logo and sometimes its programming. This entertaining video <https://www.youtube.com/watch?v=n2BhJNwutDU> shows how a bombo can be used to punctuate news stories. The Bombo Network corporate song is aired during signons, signoffs, and possibly other times. You can hear it at <https://www.youtube.com/watch?v=b38xkEmFso>

**Catholic Media Network (CMN)** is a network of approximately 50 stations affiliated with the Catholic Church. Some programs are simulcast throughout the country. The website <http://www.catholicmedianetwork.org/> has more information on the network and affiliated stations.

## MAJOR NETWORKS

**Broadcasting Corporation of China (BCC):** the BCC is divided into several island-wide networks, of which three have AM outlets. The News Network operates on a dozen MW frequencies and features local and international news, weather, traffic, sports, talk shows, and commentary. The Country Network also operates on a dozen MW frequencies. The website describes programming as "colorful and entertaining Taiwanese dialect's programs with a rich local flavor make up the largest portion of its programming that includes discussions of local customs, traditions and topics of interest to the general public." The IGo AM station on 531 is mainly a news station with blocks of drama and music. The main BCC web site is: <http://www.bcc.com.tw/>

**Han Sheng Broadcasting (Voice of Han)** operates an AM network, an FM network, and a service to the mainland. Some or all of the AM network stations have locally originated programs from mid-morning to sometime in the afternoon. The mainland service, "Kuanghua zhi Sheng", uses high powered MW transmitters on 711, 801, 846, and 981, as well as 9745 SW 0755-0105.

The website (in Chinese) is <http://www.voh.com.tw>
